

# E-learning for your classroom

## Thrive with tailor made e-learning solutions for your school.

Moodle's adaptability and engaging learning activities make it the number one LMS for all kinds of young learners, whether in traditional schools, distance education or home study.

### As a school educator using Moodle, you'll be able to

#### Keep in touch

Communicate via messaging, forums, mobile notifications. No excuses for missing deadlines!

#### Tailor assessments to your teaching

Assess formatively or summatively with custom grading scales and rubrics. Use marking workflows to control grade release.

#### Monitor progress

Use Moodle's powerful learning analytics to ensure learners are kept on task and those at risk get the support they need.

#### Reward success

Motivate your classes with digital rewards for participation and activity completion.

#### Work smarter

Engage students with Moodle's collaborative tools and get feedback to enhance your teaching.

#### Ease of use

Easy course creation and uploading of learning material.

## Why Moodle?

### Most widely used LMS

Moodle supports the education and training needs of millions of people around the world and has become the mainstream learning management system.

### The world's open source learning platform

Moodle enables you to create a private learning space online, full of engaging activities and material. You will always have full control of all your data and the way your staff, students and clients are on-boarded into the system.

#### Open source

True, full-featured, open source ensures you can own your site and your content on your own terms

#### Socialise your learning

Support your learners on their journey through private messaging, group activities and collaborative experiences

#### Extensible

Thousands of free community-created plugins to add new functionality to support students, teachers and administrators

#### Mobile-ready

Strong support on mobile devices (phones, tablets and laptops) with full functionality for students

#### Customisable

Modern interface that can be customised through themes and settings to tailor your site to your organisation's and learners' needs

#### Full integration

Strong admin features to make it integrate perfectly into any situation and with platforms and services like Google Apps, Microsoft Office 365, NextCloud and others

#### Accessibility

Build your multimedia content with full support for all students, following common accessibility standards. Benefit from integrated accessibility checking tools when adding and editing your text

#### Analytics and tracking

Monitor your learners with enhanced completion tracking and personalised learning plans, built from competency frameworks and learning objectives. Benefit from Moodle's powerful analytics to predict and support learners at risk of failing

## Advantages for students/pupils

- User friendly from age 7
- Fun
- Comfortable/relaxed learning environment
- Focused learning
- Learning at your own pace

## CORPORATE SPONSORSHIP OPPORTUNITY/OPPORTUNITIES

Get a corporate donor to sponsor your e-learning platform, and we will customise the platform to fit and promote their brand/company.
